

Given a string, **s**, consisting of alphabets and digits, find the frequency of each digit in the given string.

### Input Format

The first line contains a string, **num** which is the given number.

### Constraints

$$1 \leq \text{len}(\text{num}) \leq 1000$$

```
1 #include<stdio.h>
2 int main()
3 {
4     char str[1000];
5     scanf("%s",str);
6     int hash[10]={0,0,0,0,0,0,0,0,0,0};
7     int temp;
8     for(int i=0;str[i]!='\0';i++)
9     {
10         temp=str[i]-'0';
11         if(temp<=9&&temp>=0)
12         {
13             hash[temp]++;
14         }
15     }
16     for(int i=0;i<=9;i++)
17     {
```

```
9  {
10     temp=str[i]-'0';
11     if(temp<=9&&temp>=0)
12     {
13         hash[temp]++;
14     }
15 }
16 for(int i=0;i<=9;i++)
17 {
18     printf("%d ",hash[i]);
19 }
20 return 0;
21 }
```

Today, Monk went for a walk in a garden. There are many trees in the garden and each tree has an English alphabet on it. While Monk was walking, he noticed that all trees with vowels on it are not in good state. He decided to take care of them. So, he asked you to tell him the count of such trees in the garden.

**Note:** The following letters are vowels: 'A', 'E', 'I', 'O', 'U', 'a', 'e', 'i', 'o' and 'u'.

**Input:**

The first line consists of an integer  $T$  denoting the number of test cases.

```
1  #include<stdio.h>
2  int main()
3  {
4      int t;
5      scanf("%d",&t);
6      while(t--)
7      {
8          char str[100000];
9          int count=0;
10         scanf("%s",str);
11         for(int i=0;str[i]!='\0';i++)
12         {
13             char c=str[i];
14             if((c=='a')||(c=='e')||(c=='i')||(c=='o')||(c=='u')||(c=='A'
15             count++;
16         }
17         printf("%d\n",count);
```

```
12 {  
13     char c=str[i];  
14     if((c=='a')||(c=='e')||(c=='i')||(c=='o')||(c=='u')||(c=='A'  
15         count++;  
16     }  
17     printf("%d\n",count);  
18 }  
19 return 0;  
20 }
```

Given a sentence, **s**, print each word of the sentence in a new line.

### **Input Format**

The first and only line contains a sentence, **s**.

### **Constraints**

$$1 \leq \text{len}(s) \leq 1000$$
